

Coax Clarifier™

Test, Identify, and Qualify Dark Coax Networks.

All in one powerful handheld instrument.

Dark unpowered coax systems give no clue as to their design, condition or configuration. The new Coax Clarifier™ makes it easy to discern the layout of a dark coax network, locate faults on individual cable runs, identify remotes through splitters, and determine cable run lengths. Separate wiremapping sets allows mapping the entire coax system and measure the quality and network characterization for carrying high grade video, surveillance data and HD programming.

- Identifies cable faults
- Displays cable run quality
- Detects Coax RF Remotes through splitters
- Locates splitters in the system
- Tests and grades splitter performance
- Measures cable length up to 1,500 feet
- Wiremaps up to 12 coax locations

Benefits

- Fast testing using multiple wiremapping remotes
- Quickly discover coax system layout configuration to save time
- All testing in one unit: Discovery, Quality and Condition
- Clear concise measurement display for easy understanding of capability of each run

12 ID Only Coax Remotes

Includes Hanging Storage Pouch

Coax Run Mapping

Maps runs through splitters to show an accurate picture of the coax system layout using up to 4 Coax RF Remotes. Up to 12 ID Only Coax Remotes are also available for wiremapping on home runs.

Cable Length

Determines cable run length and reports the location of an open or unterminated cable.

Quality of Network

Measures overall network quality and clearly depicts network reading as both a bar graph and a digital return loss number, measured in dB.

Tone Tracing

Traces coax runs with four unique tones to quickly distinguish between respective outlets.
